

MUNICIPALITY OF ILINDEN

In the past period the investment cycle in the municipality of Ilinden continues with intensified pace. The investment roads lead to the municipality of Ilinden as a result of the fact that conditions for entry of new investments are continuously created. All this has resulted in the constant expansion of the business family of the municipality of Ilinden.

As a result of the implementation and realization of a real and effective concept which will enable favorable conditions for the entry of new investments as well as the optimal utilization of the resources and the opportunities, from the year 2008 up to now in the municipality of Ilinden 180 investments have been implemented out of which 33 are foreign direct investments and the unemployment that back in 2008 was 38% now has dropped to 5%.

The favorable conditions that the Municipality offers to investors, the low prices of the construction land and the small fees for the investors, as well as the intensive investments in quality road and utility infrastructure, enabled accelerated and sustainable local economic development, making the Municipality a leader in investments in the region.

The main goal of the municipality of Ilinden is to keep young people and create conditions for their better life.

An indicator for a sustainable local economic development of the municipality of Ilinden is the construction and commissioning of new production facilities that are continuously cre-

Continuous investment and reduction in unemployment
