Subject: Information for conducting the procedure for e-building permit

Through the electronic system e-building permit (<https://gradezna-dozvola.mk/Account/Login?ReturnUrl=%2f>) an efficient, transparent and unified way of acting of all competent authorities and entities according to the most modern standards is enabled in the shortest possible time term on the basis of your application.

Through this system you can submit:

1. Request for issuing approval for construction, extension and upgrading;
2. Request for changes during the construction;
3. Request for change of the investor;
4. Request for issuing an approval for use of a building;
5. Request for issuing approval for reconstruction;
6. Request for issuing the approval for conversion;
7. Request for issuing an approval for adaptation
8. Request for approval for preparatory works;
9. Request for approval of a preliminary design;
10. Request for issuing a decision for construction of buildings for which no building permit is required.

The information system enables the conduct of the procedures in all its phases only electronically, starting from electronic submission and signing of the necessary documentation by the developer, electronic preparation and adoption of the acts in the procedure, electronic notification and provision of necessary data and documentation from other involved entities and electronic issuance of acts in the procedure.

For each phase in which your item is located, you will be notified at the same time via an automated and independent email delivery system and a notification sent via the automatic short message service (SMS).

Thank you for your cooperation.
